

AT-RISK PLAN CHECK ACKNOWLEDGEMENT

BUILDING SERVICES

By executing this At-Risk Plan Check Acknowledgement, I formally indicate my knowledge and acceptance of the risks associated with the initiation of an early plan check review by Danville Building Services of the project construction drawings for my proposed construction project involving the property located at _____, Danville, CA.

(Job site address)

By executing this At-Risk Plan Check Acknowledgment, I formally indicate my knowledge and acceptance of the fact that I may potentially incur both extra cost and effort associated as a result of requesting commencement of the plan check review process prior to securing approval for the requisite Planning entitlement for my project. I formally indicate my knowledge and acceptance of the possibility that the action ultimately taken on the Planning entitlement may result in need for the project construction drawings to be modified and the need for duplicative plan check efforts.
